

Introducing Ionize Technology

Welcome to the new era of ionization
achieving rapid hydration

Pollution is a Part of Our Lives

- ▶ Water today is no longer what we knew it to be
- ▶ Water once was just hexagonal and 6 ringed micro-clustered
- ▶ Today water in the wild is 12 ringed multi-cluster with a great deal of pollution attached
- ▶ City manufactured water in most cities remains to be living water
- ▶ Manufactured water is now 12–26 ringed multi-clustered
- ▶ Reverse Osmosis Water is dead water, not for human consumption [cannot sustain life] yet people are buying millions of bottles a day & now washing up on beaches!

Reverse Osmosis Water

- ▶ Bottled bought water is referred to as 'Dead Water'
- ▶ By removing all minerals the water has no ability to transfer frequencies nor provide the human body with over 400 thousand minerals the body requires from natural water
- ▶ RO water has no ability to sustain life
- ▶ If you were to pour a bottled water into a bowl and put a fish in; *the fish will die quickly*
- ▶ The thin plastic bottles used to sell RO water contain 3 polyethylene's proven to cause breast and other cancers
- ▶ Bottles of water purchased from a shelf are generally loaded with bacteria's
- ▶ Most bottles of water have been in storage for 3 months to 3 years before they are sold or have been shipped over in hot containers on barges; baked in the sun for weeks from 3rd world countries

1 Ionized Technology for Hydration

IONIZER INTERIOR

It has **seven electrode plates** to ensure sufficient power.
It is **easy to use** and compactly designed.

Point 1

The electrolytic cell is equipped with **seven electrode plates**, which is powerful and yet compact in design.

It is possible to produce an ample amount of electrolyzed water with the ORP value in the range of +1130mV and -800mV. This design is made possible by loading an electrolytic cell with seven electrode plates that use electrodes made of platinum plated titanium. (Depending on the choice of resulting water and original water)

The 11.5 pH water contains a lot of hydroxide ions (OH-) and positive ions (such as calcium ions) produced by electrolysis, and it also contains hydrogen.

Point 2

Equipped with an electrolysis enhancer tank
Strong Acidic Water and Strong 11.5 pH Water produced steadily and continuously.

The built-in tank for the electrolysis enhancer makes easily to put in the electrolysis enhancer which is necessary to obtain strong acid water and strong 11.5 pH water, and allows you to produce both kinds of water steadily and continuously.

An injection of electrolysis enhancer (0.93pt) produces around 7.93 gallons of strong acidic water in around thirty minutes (this figure depends on the water quality).

Point 3

You will be notified by a large-sized liquid crystal display (LCD) and the voice prompted guide.

Easy to use one-touch panel.

A clear, large-sized LCD and the voice prompts will inform you of the type of water being produced (7-9.5pH water, acidic water, strong acidic water, or clean water) and necessary information.

The operation is very easy, because you only need to touch a button to power up or down or to select the type of water you would like to obtain.

When you push the button for strong acidic water, the secondary hose releases strong acidic water and the flexible pipe releases strong kangen water Concurrently.

Liquid crystal display

A large-sized, easy-to-see liquid crystal display shows you the kind of water being produced and the information for you.

Power button

A lamp that displays the type of water produced

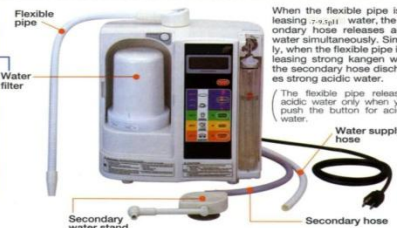

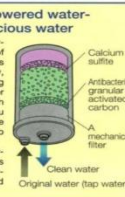

Mode-select button

You can select the type of water you would like by the touch of a button.

The three-layered, high-powered water-cleaning filter creates delicious water

You will be able to use your water-cleaning filter until the total amount of water the filter has treated reaches around 3,000 gallons. That is to say, you can use it for six months supposing you use around 16 gallons of water per day. (This period differs depending on the quality and amount of water). You will be notified by the LCD, voice prompts, and alarm when it is time to exchange the filter.

The three-layered, high-powered water-cleaning filter removes matters such as lead, remaining chlorine (bleaching powder), effluvia, rust, and impurity, and still keeps minerals.

Ionized Technology for Hydration

100% hydration water vs. 7-15% potable water
Electrolytes and Electron advantages

7 plates with an ORP of 800

Increased Hydration & Sterilizing

Electrolytes and Electron advantages

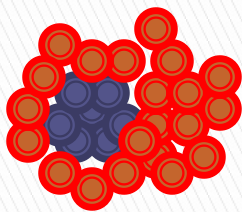

Inquire about injured sites, rehabilitation advantages of 11.5 pH & cleaning advantages with a higher ORP

HOCl producing 2.5 pH / 7 plates designated to 2.5 & 11.5 pH / ORP 1200
Five plates designated for drinking ORP 900

Water Crossing the Membrane

One small water drop turns into a cluster of free radicals attached by manufacturing layers of chemicals and we wonder why all living matter is suffering from dehydration?

- ▶ Humans, plants and animals will not change their need to grow regardless of pollution levels
- ▶ How can a human, plant or animal achieve hydration with so many free radicals attached to water today
- ▶ Now imagine the 6 ring growing to a 12-26 ringed! How can manufactured or polluted waters cross over the membrane gate? It doesn't, causing dehydration within the tissues

Only 7-15% of potable water arrives without

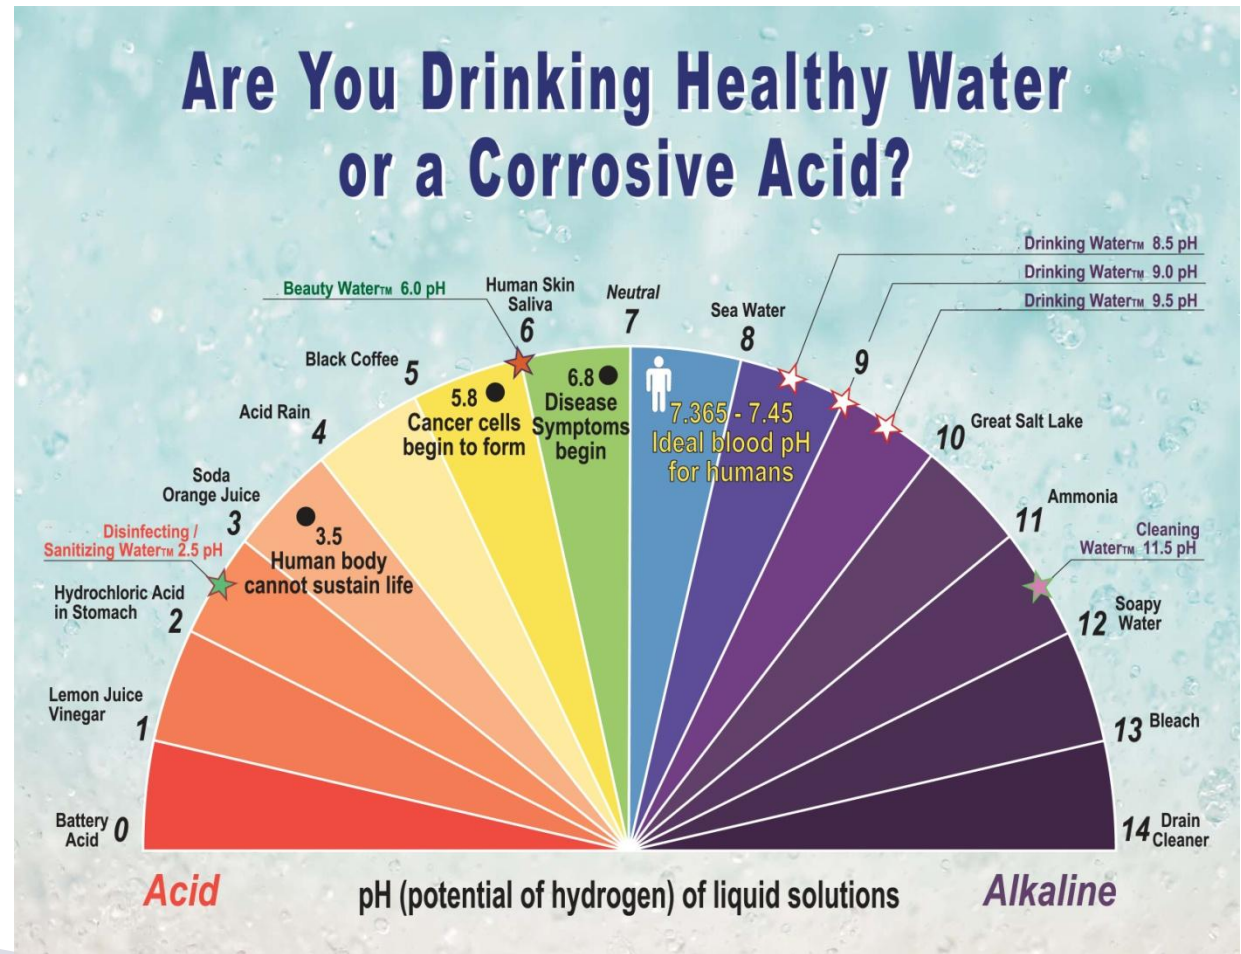

pollutants or chemicals attached from potable water

pH System

=Health of living matter

It is scientifically difficult to contract illness or disease in an alkaline pH body when tissues are fully hydrated with living clean water.

Illness & disease live in an acidosis body of toxic pollutants or non valued water within the tissues, slow moving blood unable to flush out toxins.

Nobel Prize

- ▶ Doctor Otto Warburg won a Noble Prize in 1931 discovering that illness and disease cannot live in an alkaline oxygen enriched environment
- ▶ Illness & disease thrive in an acidic oxygen deprived environment

Dr. Otto Warburg 2 time

Winner of the 1931 Nobel
Prize
In Physiology

DISCOVERED
THE CAUSE
OF
CANCER

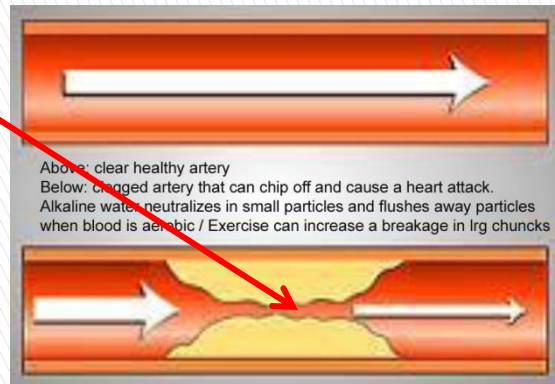

DR. OTTO WARBURG

Cancer grows an Oxygen Deprived Acidic tissues

Disease cannot live in an OXYGEN ENRICHED ALKALINE
Environment!

Nobel Prize Winner

Plaque on Arteries:

Drinking the right kind of hydrogen enriched alkaline ionized water disassembles free radicals allowing the blood to flush out impurities. In pic above resembles a patient who may require a stint implant.

- ▶ When the blood moves slow its unable to flush out impurities, plaque on arteries begins to layer, rendering tissues immobile like raisins. [non-aerobic]
- ▶ Tissues are required to open and close to absorb oxygen, water and nutrients and minerals from the blood [aerobic blood with living water]
- ▶ A large dislodging of plaque may result in serious medical risks
- ▶ All acidosis bodies are at risk regardless of age

Reduce the plaque

One particle at a time

7 medical grade platinum plated titanium plates

A 7 plate machine provides a high ORP [electrons] aerobic clean hexagonal water assists in layer reduction to be released. The higher the ORP increases tissue hydration. When tissues are re-hydrated they are better able to expand and extract as they were designed to do; to flush out impurities through the blood.

Today's water has become is polluted:
A technology with the ability to return water to its origin is the wave of the future as humans continue to pollute the environment

Our Technologies

- ▶ Meet the FDA & CDC standards
- ▶ Have 3 ISO certifications
- ▶ Have 3 WQA certifications
- ▶ Provided green light from BC Health Authority
- ▶ The only ionizer in the world of its size to be deemed a medical device by the #1 Medical Association globally

Sterilization Abilities

- ▶ This one technology provides one of the cleanest drinking waters globally
- ▶ Produces HOCl at 2.5 pH strong enough to kill the majority of bad bacteria's found today showing up in various industries
- ▶ A 2.7 pH HOCl is being sold in the USA for 2600.00 a gallon from a 40K technology
- ▶ Our technology produces HOCl at 2.5 pH with unlimited supplies [machine must be kept clean]

pH scale

- ▶ Most people believe you can measure pH by litmus paper
- ▶ pH is the measure of energy / movement and to obtain a true reading one must use an ORP meter.
- ▶ Oxidation Retention Potential meter
- ▶ Cities are mandated to produce a water ranging from 6.5–8.5 pH
- ▶ Measure the water with an ORP meter and it will remain to be acidic yet by a litmus paper it may read between 6.5–8.5 pH

Consuming acidic water, fluids or food keeps the

body in an acidic pH

Electrons and Electrolytes

- ▶ When urine is yellow: the substance consumed is flushing out the required electrons, electrolytes and minerals the body requires
- ▶ Tissues function at peak when fully hydrated
- ▶ Get results through hydration
- ▶ Muscles and tendons respond with increased endurance and power
- ▶ Focus increases with hydration
- ▶ Skin has a younger appearance when hydrated
- ▶ Reduce aging with proper hydration
- ▶ Increase joint function when cells are properly hydrated
- ▶ Hydration aids in recovery

Individual benefits

- ▶ Hydrating waters increase overall health
- ▶ One glass of these alkaline ionize water has approximately 30 times more anti-oxidants than a cup of green tea
- ▶ Aids in dental care; such as gums, tooth infections and more
- ▶ Use for burns, small cuts, laundry, skin conditions & care, aching joints, sciatica, back-leg-arm strains & more
- ▶ Aids with arthritis, high blood pressure, heart, all illnesses & diseases
- ▶ Reduce water weight
- ▶ Provides water which is 100% usable with maximum hydration benefits
- ▶ Energy water retaining the earth minerals vs. dead or contaminated large bloating waters
- ▶ Technologies that remove unwanted chemicals and free radical contaminates
- ▶ Use to clean your foods and stop paying high prices for organic = make your own by pre-soaking your foods to remove free radicals or rehydrate foods
- ▶ The uses of these waters are unlimited

Living in Pollution

- ▶ It's a fact pollution is in the air, our water; the '?' is how will you & those you know address it?
- ▶ Hydrate to flush out impurities and live a life freer of illness & disease or
- ▶ Dehydrate with large generally contaminated multi-clustered water or dead water with no value and starve your body of natural minerals leaving you with:
 1. Illness & disease, barely able to move, spend your lifetime at doctors appointment, specialists and your income what's left on pills?
 2. The choice is yours with the technologies available today

Before You Buy an Ionizer

- ▶ **Interior** plates sealed cannot be cleaned
[beware of the bacteria that will grow on those plates]
- ▶ Beware of pre-dual filters as one will have pre-minerals and the FDA has deemed this a health hazard
- ▶ **Ask to view certifications to see them yourself & does it meet FDA & CDC standards:** see Lab Reports
- ▶ Ensure the unit can be sent to a Vendor Head Office to be deep cleaned and **inspected by a trained technician**
- ▶ Ensure the unit is capable of self **cleaning** and has the ability to clean itself aiding in **removing bacteria** on the ionizing plates periodically
- ▶ **Ensure** the ionizing plates are medical grade platinum plated titanium plates. Does the unit historically have the ability to last 15–20 years [plates must be kept clean with regular cleaning]
- ▶ **Be sure** that the actual machine itself has achieved WQA certifications, not just the filters from other companies a company may use
- ▶ Be sure the wattage & amperage is sufficient to deliver a steady balanced energized water consistently :120V – 3.2 amp–60 Hz
- ▶ Does the unit have an actual **transformer power supply** to produce an elevated power steady even power supply ?
- ▶ Is it ULC approved?
- ▶ Inquire if the unit has only a switch mode power supply that is unable to be consistent in the power supply and if ran steady would burn out quickly?
- ▶ Energy efficient ionize technologies only means you will pay for a machine that is unable to produce a steady energized water

Onemachine that can provide

- ▶ Clean, hydrating hexagonal energized water
- ▶ 100% hydrating waters
- ▶ Savings on usual household expenditures
- ▶ Provides water in its origin
- ▶ Earth centric
- ▶ Produce a consistent energized reduced micro-clustered living water
- ▶ Lab Test that supports sterilization
- ▶ Increases energy, focus, overall health, sterilization and much more
- ▶ Medical ISO certifications & WQA certifications on full machine operations

Purchase Options

- ▶ Cash or Credit Card
- ▶ Finance with Medicard.com
- ▶ In-house Vendor financing [no-credit check: larger down-payment]

Investing now may save your life & your money by saying no to acidic & dead water

Generally the 3 plate is sufficient for home use. In the event of serious illness the larger ORP machines are recommended and for commercial usage

The ORP is the measure of Electrons and Electrolytes [oxygen] when the body tissues are struggling due to dehydration this is an important factor to recondition the body cells and promote hydration and an alkaline body.
